## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 9-12 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Chen et al. (US 5,545,574).

Chen discloses the limitations:

the step of forming a gate electrode (26, fig.3) on the gate insulating film (24, fig. 2);

the step of selectively introducing into the source-drain diffusion layer atoms which inhibit silicidation (52 and 54, fig.5); and  
the step of converting the high melting point metal film into a silicide film (72 and 74, fig.7) (col. 3, ln. 5 – col. 4, ln.31). Chen does not explicitly state it is selectively depositing the silicidation-inhibiting layer, however Chen does disclose forming nitrogen containing material on the exposed surfaces only (col. 3, lns. 34-36). therefore one of ordinary skill would consider this process step a selective depositing step.

### ***Election/Restrictions***

3. Applicant's election without traverse of claims 9-12 in Paper No. 8 is acknowledged.
